VEHICLE SALES & INVENTORY ANALYSIS

Business Insights for a Car Dealership Using Data Analytics

Prepared by: Mojalefa Molatlhegi

Date: 23 April 2026

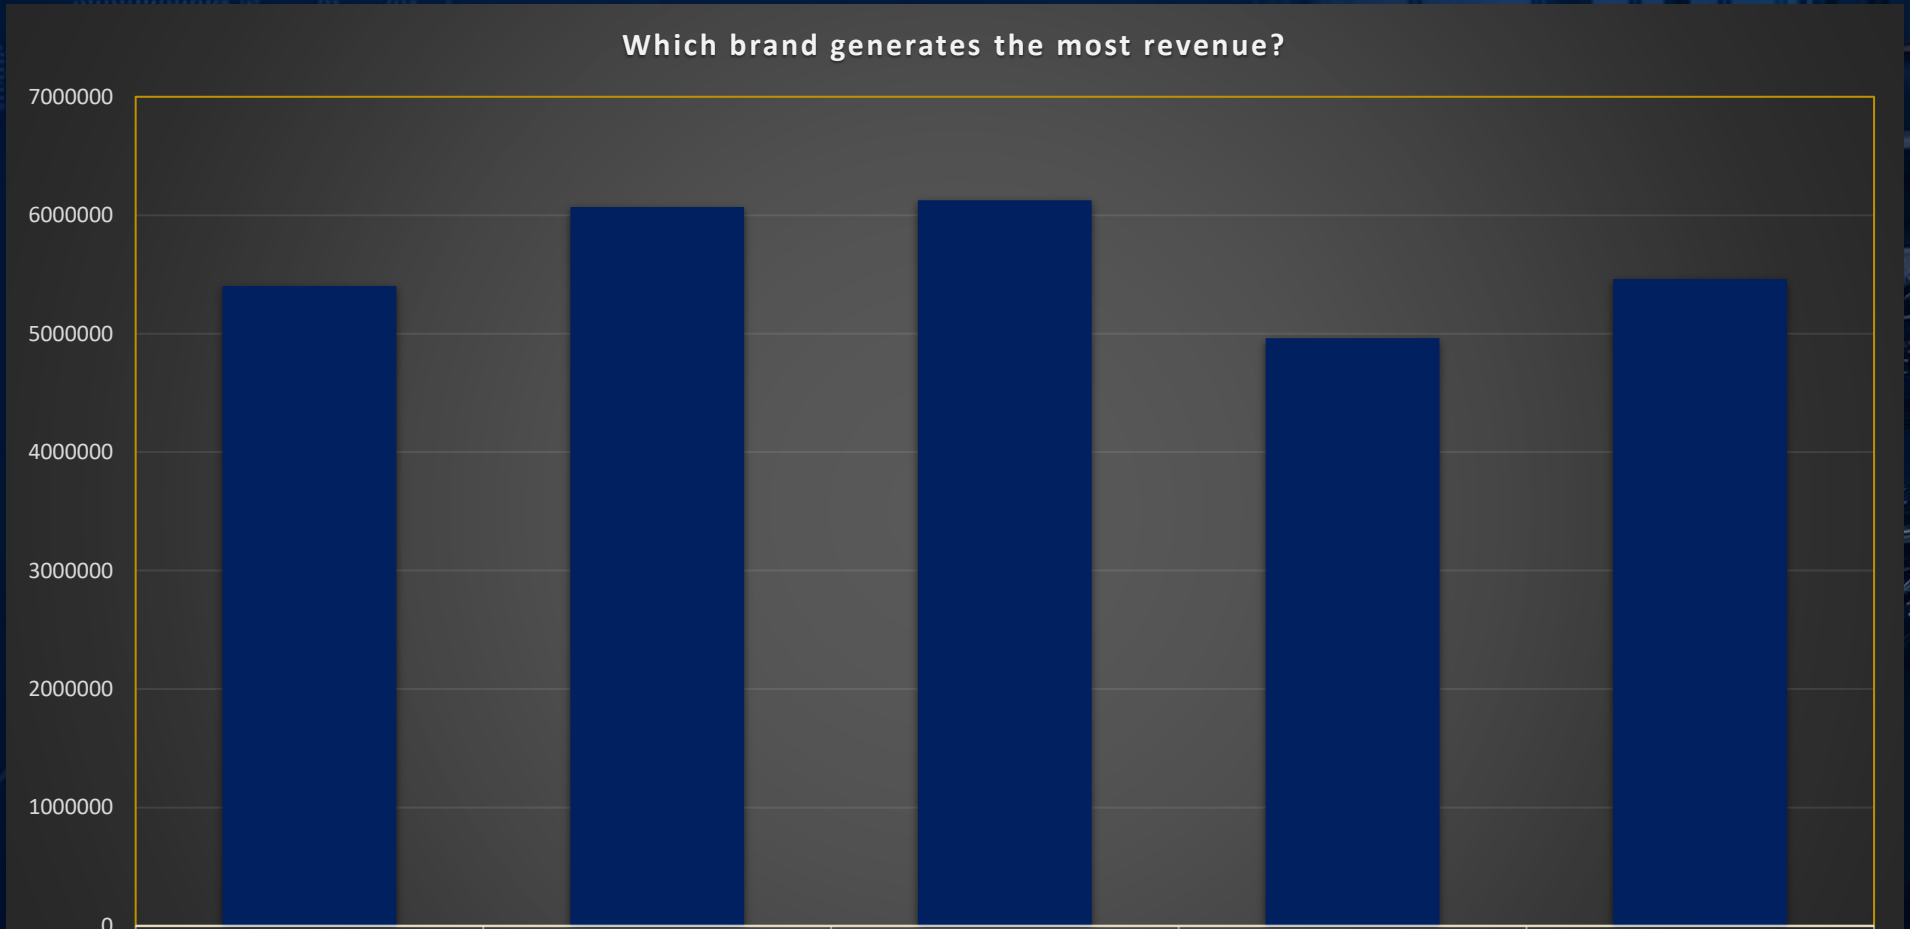
Business Challenge

We Buy Cars operates across multiple branches and deals with large volumes of vehicle inventory. Management needs data-driven insights to improve sales performance, maximize profitability, and reduce the time vehicles remain in stock.

The company faces the following challenges:

- ✓ Identifying which vehicle brands and models generate the highest revenue
- ✓ Understanding which branches perform best in terms of sales and profit
- ✓ Measuring how long vehicles stay in inventory before being sold
- ✓ Detecting sales trends over time to improve planning and stock allocation
- ✓ Finding opportunities to improve inventory turnover and increase profits

REVENUE BY BRAND



BRANCH PERFORMANCE

	Centurion	Midrand	Pretoria	Randburg	Roodepoort
Total	2148057	6539425	7770375	4410325	7153722

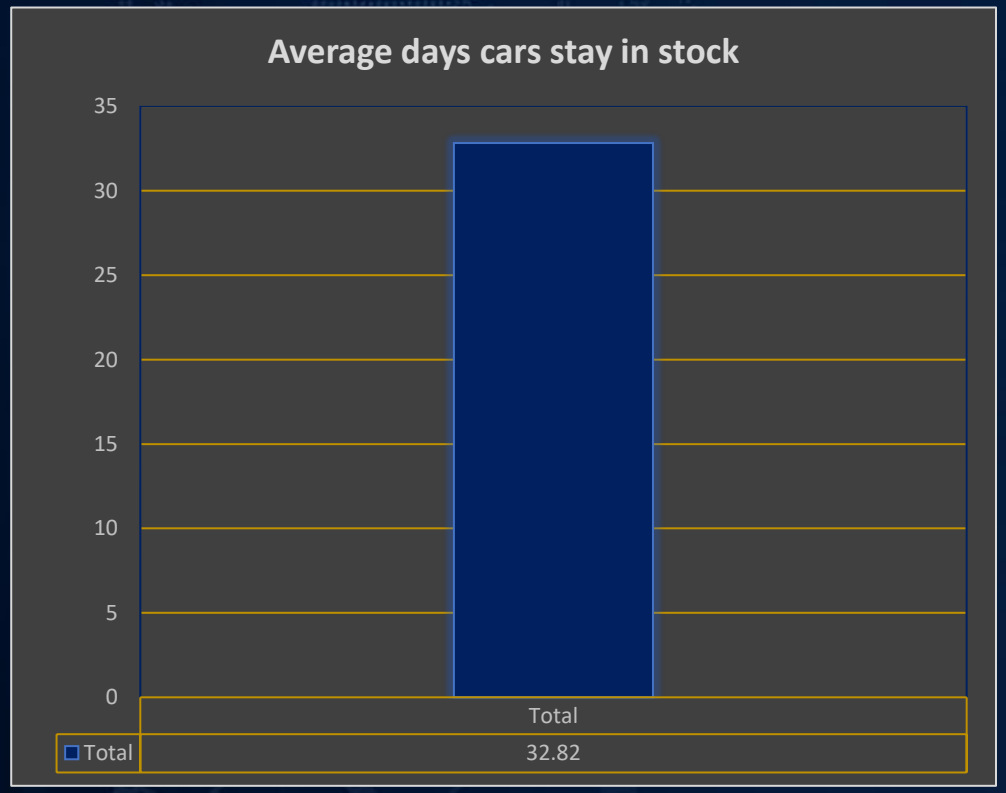
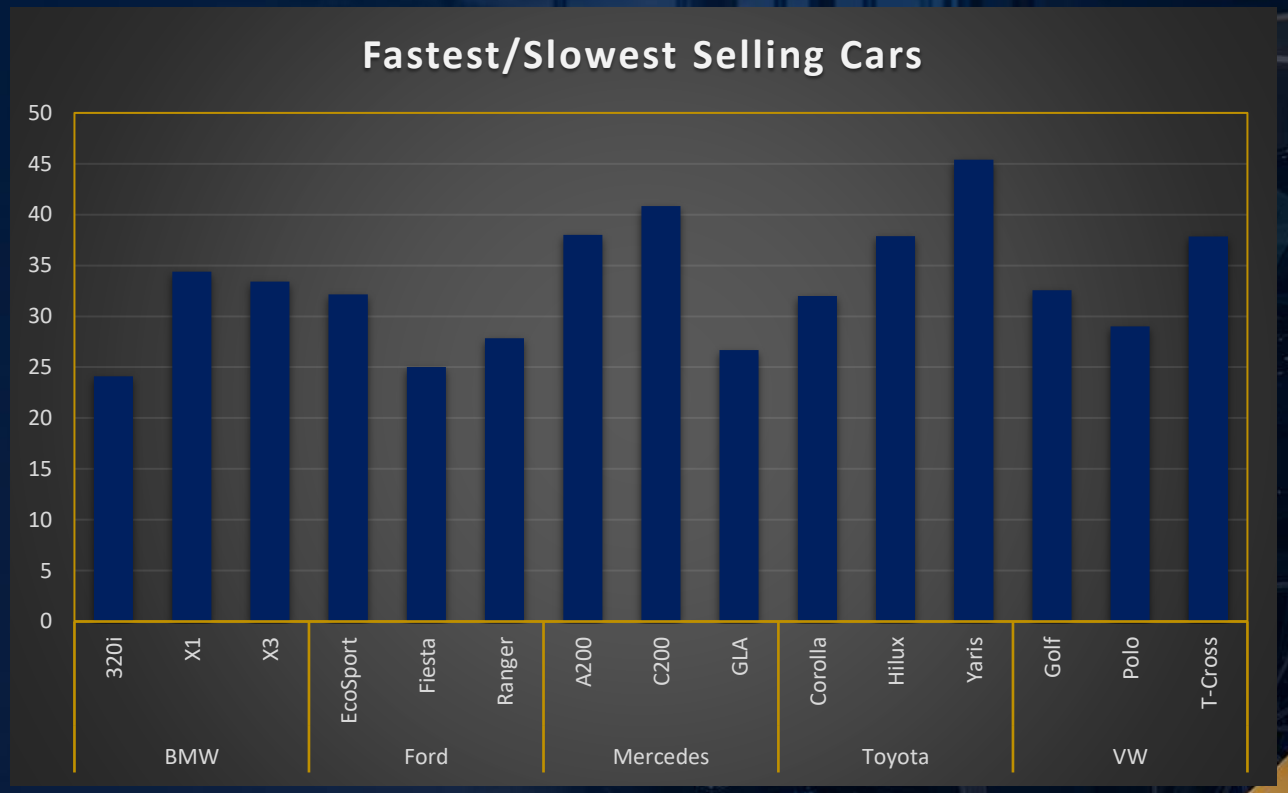
INVENTORY TURNOVER





RECOMMENDATIONS/CONCLUSION

Based on the analysis, the following recommendations are suggested to improve business performance at We Buy Cars:

Recommendations

✓ Increase stock levels of high-performing brands and models such as top revenue generators.
✓ Reallocate slow-moving vehicles to branches with stronger sales performance.
✓ Focus marketing efforts on branches or vehicle types with lower sales.
✓ Reduce inventory holding time by pricing slow-moving vehicles more competitively.
✓ Monitor monthly sales trends to improve stock planning and forecasting.
